

THE ORIGINAL TEXTURED FOAM ROLL

Our patent-pending textured (ribbed / ridged) design mobilizes soft tissue to enable deeper access to muscles so you can more precisely target sore and knotted tissue.

Compared to traditional smooth rollers, our original patent pending (ridged/ribbed) design prevents excess sliding so you have more control of the roller position to achieve effective tissue release.

Made in the USA from very high quality, long lasting, and easy to clean foam.

PURPLE Firm

Invented, designed and clinically tested by Licensed Physical Therapists.

The Thera-Roll® Difference.

Traditional (smooth) foam rollers only compress muscle fibers.

The **Thera-Roll®** patent pending textured (ribbed / ridged) design penetrates and releases tense muscle fibers to decrease pain and stiffness.
